Signature	<u>Matthew Zischka</u>
Typed or printed name of person signing this certificate	

AMENDMENT B

Sir:

This is in response to the Office Action mailed April 1, 2003.

REMARKS

Claims 1-26 are pending.

The Examiner has rejected pending independent Claims 1, 13, 19, 20, 21, and 22 under 35 USC 103 as being obvious in view of U.S. Patent No. 5,838,924 to Anderson et al. ("Anderson") and U.S. Patent No. 6,452,906 to Afferton et al. ("Afferton"). The Applicant respectfully traverses these rejections.

Specifically, the Examiner takes the position that Anderson discloses detection of signal failure (SF) defects (e.g., LOS, LOF, LDC) within an ATM network at the physical (i.e. SONET) layer. The Examiner acknowledges that Anderson does not suggest detecting signal degrade (SD) defects at the SONET layer. Indeed, Anderson discloses detecting SD at the ATM layer through "performance monitoring" flows.
